

Flip The Cup

Overview

A team drinking and relay game. Two teams line up along opposite sides of a table to race against each other, downing a small drink and flipping their empty cups bottom-side up before passing the turn to the next teammate.

Setup

- Teams stand on opposite sides of the table, facing each other in a single line.
- Place one cup filled, with small amount of drink, on the table directly in front of every player.

Gameplay

1. Starting the Relay
 - The first players at one end of the table start drinking on the signal.
 - No other players may touch their cups until it is their turn.
2. Drinking and Flipping
 - The active player drinks the contents of their cup completely.
 - Once finished, the player places the empty cup open side up, slightly overhanging the edge of the table.
 - The player flicks the bottom rim of the cup upward with their fingers, trying to flip it 180 degrees so it lands upside down on the table.
 - If the cup lands on its side or falls off, the player must reset it on the edge and try again until it successfully lands upside down.
3. Passing the Turn
 - Only after the current player's cup lands completely upside down can the next teammate pick up their cup to start drinking and flipping.
 - The relay continues down the line player by player.

Winning

The first team to have all players successfully finish their drink and flip their cup wins the round.
